## Professional Summary

Computer Science graduate with hands-on experience building full-stack web applications using React, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL. Experienced in REST API integration, authentication, real-time communication, database-driven applications, and responsive interfaces. Built and deployed practical software projects and contributed to production-oriented development during internships.

## Experience

**DoorPay** May 2026 – Present
Software Development Intern Part-time

- Supported development of an admin dashboard using Next.js and React.js, contributing to feature implementation and UI improvements.
- Assisted with frontend development, API integration, and debugging of dashboard functionality.
- Contributed to resolving development issues and refining existing features while working part-time with the development team.

**Kanad Networks Pvt. Ltd.** Jan 2026 – Apr 2026
Software Engineering Intern

- Contributed to development of a telecom management system covering site installation, commissioning, configuration, alarms, and troubleshooting.
- Worked on frontend and backend features, including authentication, role-based access, and API integration.
- Assisted with real-time dashboard updates using Socket.io and MongoDB-based data handling.
- Supported testing, debugging, and deployment-related fixes during development.

## Projects

**Kanad Networks – Telecom Deployment & NOC Management System** GitHub — Live

- Built a full-stack platform to manage telecom deployment and NOC workflows.
- Implemented JWT authentication, refresh tokens, RBAC, and real-time alarm updates using Socket.io.
- Deployed the frontend on Vercel and backend on Render, configuring production API connectivity and CORS.
- Fixed production issues involving Socket.io, MongoDB, authentication, and API connectivity.

**AI Mock Interviewer** GitHub — Live

- Built a full-stack mock interview platform using Next.js, PostgreSQL, Drizzle ORM, Clerk, and Gemini API.
- Added features for interview creation, question generation, answer submission, feedback, and interview history.
- Created backend API routes and deployed the application on Vercel.
- Fixed production issues related to API routes, database connection, authentication, and environment variables.

**Job Search Portal – Group Project** GitHub

- Developed the frontend interface for a job portal using React and Vite.
- Built responsive pages for job search, job listings, applications, and user workflows.
- Integrated frontend components with REST APIs and handled loading, error, and form interaction states.

## Technical Skills

Languages: JavaScript, Python, C++, Java, SQL
Frontend: React.js, Next.js, Vite, Tailwind CSS, HTML, CSS
Backend: Node.js, Express.js, REST APIs, JWT, Socket.io
Databases: MongoDB, PostgreSQL
Tools: Git, GitHub, Postman
APIs: Gemini API, REST API Integration

## Education

**Parul University** 2026
B.Tech in Computer Science and Engineering – CGPA: 8.7/10

**St. Paul Secondary School** 2022
Class XII – 84%

**St. Paul Secondary School** 2020
Class X – 86.4%

## Certifications & Achievements

- NPTEL – Computer Networks and Internet Protocol – Elite, 76%
- NPTEL – Introduction to Internet of Things – Elite, 77%
- Vadodara Hackathon 4.0 – Certificate of Participation, Parul University
